

MUHAMMAD YUSUF | SYSTEM ENGINEER VBP | MULTI-CLOUD | TERRAFORM | CI/CD | CLOUD AUTOMATION

A.S Computer Science & Engineering | Bay Area, CA | rmyusufrehman@gmail.com | +1 (424) 305-8206 | **Citizenship:** United States

EXECUTIVE SUMMARY

Cloud and systems engineer supporting secure, reliable **AWS and Azure infrastructure**, CI/CD, and production operations. Applies **Terraform, Ansible, Python, and Bash** to automate configuration and deployments, improve system reliability, and resolve incidents. Experienced with container platforms, monitoring, and cross-functional delivery.

TECHNICAL EXPERTISE

- **Cloud & Infrastructure:** AWS (EKS, IAM, VPC, Lambda, API Gateway, ALB, EventBridge, CloudWatch), Azure (VNet, Entra ID, Azure Monitor, Functions, ARM/Bicep, Azure SQL), high availability, disaster recovery, cloud migration, DNS, SSL/TLS
- **DevOps & Platforms:** Configuration management, Terraform, Ansible, Docker, Kubernetes, Helm, GitOps (ArgoCD/FluxCD), CI/CD (Jenkins, GitHub Actions, SonarQube)
- **Monitoring & Security:** Prometheus, Grafana, CloudWatch, logging, incident response, SLO/error budgeting, security
- **Languages & Tools:** Linux & Windows Server Administration, PowerShell, Python, Bash, Git, JavaScript/Node.js, Golang

PROFESSIONAL EXPERIENCE

Cloud & DevOps Engineer | Arqon Consulting | Bay Area, CA | Jan 2025 - Present

Supported production multi-cloud infrastructure and CI/CD workflows

- Engineered high-availability **AWS/Azure infrastructure**, maintaining **99.9% uptime** for production workloads.
- Optimized GitHub Actions/Jenkins pipelines with **SonarQube quality gates**, enabling **< 60s deployments** and automated rollbacks.
- Automated **artifact management and release pipelines** to strengthen deployment consistency and traceability.
- Automated infrastructure with **Terraform, Ansible, Python, and Bash** to improve reliability and reduce MTTR.

Cloud Engineer | Ventera Group | Bay Area, CA | Aug 2023 – Jan 2025

Built scalable cloud platforms and deployment systems for enterprise applications

- Managed **containerized services** and secured artifact workflows using ACR/ECR and Nexus.
- Improved deployment efficiency by **60%+** through CI/CD pipeline automation while reducing release errors.
- Built reusable **Terraform modules** to provision complete environments in **5–10 minutes**.
- Deployed **Docker/Kubernetes** workloads with scalable ingress routing, achieving **10–30s service readiness**.

EDUCATION & PROFESSIONAL DEVELOPMENT

- **A.S. Computer Science & Engineering**, Los Angeles Harbor College (2025–2027)
- **Certifications & Tooling:** AWS SAA | AWS CCP | Terraform | GitHub Actions | Jenkins | Docker | Kubernetes | CloudWatch
- **Core Strengths:** Ownership, cross-functional collaboration, problem-solving, systems thinking
